

The **anuwo GmbH** is specialized in SAP-Archiving solutions – independently of the archive provider. Primarily, anuwo provides consultation in the areas of document management, archive migration, SAP ILM and data archiving. Over the years, we built up broad knowledge and a practice-oriented expertise through diverse customer projects ranging in size from small businesses over DAX-listed companies to large multinational corporations.

„We are looking for teamplayers with a passion for consulting and a distinct sense for the customers' needs!“

We are currently looking to immediately fill the position of a:

Senior SAP Consultant (f/m/d)

What you can expect

- Your task is the independent servicing and management of migration- archiving and ILM projects.
- You are consulting in the areas of archive migration or data archiving projects in regards to infrastructural and process-based questions.
- You are responsible for the operational implementation of archive migration or data archiving.
- Based on your analysis you identify optimization potential in regards to project steering, customer requirements and customer communication.

Who you are

- You have successfully completed a degree in the field of (business) informatics, economics, business engineering or business consulting at university, university of applied science or an equivalent course of study.
- You already have first working experiences and also have a strong IT-affinity and ideally own some experience in SAP.
- Already existing programming experience is beneficial.
- You have a high level of written and spoken German, as well as in English and handle customer communication confidently and professionally.
- You inspire our customers with your full dedication and friendly nature as well as applying tailored methods to communicate with different audiences.
- You are willing to attempt temporary, project-related travel activity.

What makes us unique

- We are innovative pioneers in SAP-archiving consulting and accompany our partners and customers on their way towards digital transformation.
- We are consulting based on self-developed software solutions for archive migrations which are tailored to meet exactly the needs of our customers.
- As a growing business with short decision-making processes we provide a lot of space for good ideas.
- We are a mixed team of developers and consultants with a wide variety of professional backgrounds whose individual strengths drive and shape our business.

What we offer

- A friendly working environment where cooperation is highly rated
- Flexible working hours
- Training-on-the-job with the support of experienced colleagues
- An attractive compensation
- An open-ended employment contract
- Free water and fruits
- Individual trainings
