

## Join the anuwo-Team and take the next step!

To strengthen our team, we are seeking:

**SAP-Migraters /Transformationconsultants (m/w/d)**

### Who is **anuwo**?

For 13 years, we have been supporting companies from all industries worldwide in transforming their SAP system landscapes. With our specialization in **archiving**, we support our customers from a business perspective and pursue a holistic approach that bridges the gap between business departments and IT.

From strategic planning and technical migration to the optimization of complex archive landscapes – **we move archived data and documents!**

### What awaits for **you**?

- **Implementation of SAP migration projects** in the archiving area – whether for SMEs or global players – we are here for everyone!
- **Communication** with partners and customers in the context of transformation projects
- Reliable and conscientious **project documentation** – keep us updated!
- With increasing project experience, you will independently identify potential for optimization in terms of **project management, customer requirements, and customer communication**

### What **you** should bring to the table?

- A **degree** in (business) information technology, business administration, or a comparable qualification
- **Technical experience** in the SAP environment
- Interest in **document management, data migration**, and digital business processes
- **Analytical thinking** and a structured, solution-oriented approach to work
- Strong **team and communication skills** in a project-oriented environment
- Very good written and spoken German, good English skills are an advantage

---

### What makes **you** special!

- **Analytical thinking:** Ability to quickly grasp complex technical relationships and develop sound solutions
- **Accuracy:** High level of care when handling data, processes, and documentation, especially during migration and archiving
- **Initiative and sense of responsibility:** Ability to work independently and willingness to take on responsibility
- **Structured and solution-oriented approach:** Efficient approach even in challenging project situations

### Sounds **interesting**?

Then we look forward to receiving your application and getting to know you!
