

WE HANDLE
YOUR **KNOWLEDGE**
IN **SAP**
FOR **AUDITS**

Archiving Service Portfolio

Why anuwo?

Challenges?

- Archive process services from business and audit point of view
- Independent from archiving or decommissioning provider
- All projects in time & budget
- Own migration engine for all SAP archiving scenarios

Service Solutions

BUILD

anuwo builds and harmonizes
document processes –
S/4 optimized

▷ Optimize Document Processes

MOVE

anuwo moves
archived knowledge selectively
to complete transformation

▷ M&A / Archive Cloud Moves

CLEAN CORE

anuwo cleans up
SAP database (SARA) and helps
business to be auditable anytime
also in case of decommissioning

▷ Keep your SAP fit – for audits

Build

Process design for

- fitting document scenarios
- all business areas
- S/4 HANA – optimized

Implementing & Customizing

- Harmonized Document Management (HDM) in S/4
- Business Documents (Document Management DMS, ArchiveLink, SAP Office GOS)
- Folders (incl. XFT-AddOns like Personal files)

Move

Selective Migration of archived documents and data for

- Merge & Acquisition projects
- S/4 HANA roadmap
- New business processes

Moving

- from SAP to SAP
- from SAP to NonSAP
- from NonSAP to SAP

Harmonizing

- from ArchiveLink/GOS to DMS
- organizational structures in your archived files (SARA)

Splitting

- only relevant archived data into new archiving files (SARA)

Clean Core – SAP Data Archiving

Your SAP is growing and growing and growing...

anuwo handles your business needs – impacted by SAP data archiving –
to build confidence within the business

Implementing of best practice archiving scenarios together with business

- Business is auditable
- Users save time in daily work
- IT saves money in database cost
- Reduce database for move to RISE or in S/4 Brownfield

Clean Core – Decommissioning

Which audit cases exist on legacy data?

- In collaboration with the business anuwo helps to summarize all different audit cases
- Which reports of the legacy SAP system must be available also in the decommissioned environment?

Choosing/Installing the best fitting decommissioning tool

- anuwo uses existing decommissioning tools
- Recommendation based on audit requirements/reports
- Build confidence within the business that they will be still auditable in short notice!
- IT saves money by shutting down legacy SAP systems

Customer scenarios on archiving

- Carve out / M&A
- S/4 HANA Transformation
- Readiness for RISE
- Archive cloud move
- Non-SAP (Extraction from SAP, Import to SAP)
- Decommissioning
